### COVID-19 Risk Assessment Template v11 23<sup>rd</sup> February 2021

Please find attached a COVID-19 risk assessment template for schools that has been prepared in response to the Government's guidance for full opening. The measures set out in this risk assessment provide a framework for school leaders to put in place proportionate protective measures for pupils and staff. **The Governing Body/Trust Board must take ownership of the risk assessment and have oversight of the principles behind its contents.**

This tool may be useful as you undertake planning around a range of 'protective measures' and is entirely optional. Some sections will be more or less applicable, this is a template document and please change, adapt and supplement with additional detail as necessary.

**School Leaders should share their risk assessment with the school workforce and should consider publishing it on their website to provide transparency of approach to parents, carers and pupils.** Schools should also review and update their wider premises, staff and pupil risk assessments and consider the need for relevant revised controls in respect of their conventional risk profile considering the implications of coronavirus (COVID-19).

The new variant (of COVID) transmits more easily than the previous one but there is currently no evidence that it is more likely to cause severe disease or mortality. The way to control this virus is the same, whatever the variant. It will not spread if we avoid close contact with others. Wash your hands, wear a mask (when necessary), keep your distance from others, and reduce social contact in line with guidance. It remains vital that these measures, along with enhanced environmental cleaning and ventilation, are practised stringently.

The template risk assessment should be used alongside the government guidance below:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance>
